

Ascriptica™ is a comprehensive tool allowing schools and districts to coordinate course offerings and tracking of professional development achievement for any size school or district. Highlights of Ascriptica include:

Course Management – Ascriptica provides flexible tools for managing course offerings, including:

- **Dynamic Categories:** Organize courses by department or subject matter
- **Shared Content Management:** Designate staff to control course offerings in each category, with district sign-off
- **Customized Course Details:** Add custom details to course descriptions
- **Flexible Enrollment Dates:** Configure courses with specific enrollment start and end dates

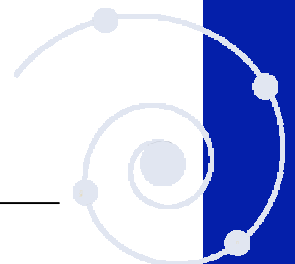

Course Catalog – Users may access the online course catalog securely from home or work, any time. Catalog features include:

- **Flexible Searches:** Locate relevant courses by category, date range, location, and target audience
- **Course confirmations:** Send notifications for each course registration or withdrawal; send reminders before the first day of class.
- **Waitlists:** Automatically track waitlists and enroll participants as spaces become available

Instructor Tools – Ascriptica is designed to assist instructors in their work by providing:

- **Class Communications:** View class rosters, wait lists, and use Ascriptica to send email to all participants
- **Sign-in Sheets:** Generate sign-in sheets for each course to provide tangible proof of attendance
- **Reporting:** Designate course completion and credit, including partial credit if desired
- **Certificates:** Print customized certificates of completion

Course Evaluations – Online course evaluations are available for every offering. Features include:

- **Multi-Tiered Questions:** Specify questions on a district-wide basis, within a category, or for any one course
- **Required:** Designate evaluations as mandatory, blocking release of completion points until finished
- **Security:** Record all responses anonymously
- **Analysis:** Provide summary reports to instructors and category administrators to identify trends

Reports – Extensive, flexible reporting is built into Ascriptica at both a system-wide level and on a category basis, giving professional development and departmental administrators the data they require. Some of the pre-defined reports include:

- **Employee Training History:** Generate reports by date range, work location and position
- **Standards:** Summarize course offerings by state standard in compliance with Florida reporting requirements
- **Evaluation Summaries:** Summarize evaluations at the district, category or class level
- **Instructors:** Report details for all courses and hours taught
- **Accounting:** Calculate costs dynamically based on enrollment

User Management – Integrated user management builds on existing directory information, providing:

- **Security:** Authenticate staff prior to accessing Ascriptica
- **User Accounts:** Leverage the FirstClass server architecture for Account management, user authentication, and security protocols
- **Non-District Employees:** Enroll external users after allowing your staff the first chance to sign up
- **Policy controls:** Utilize enrollment limits and lock-out features to control misuse
